

# Thinking Differently about Cyber Risk

*In Association with*

Date: 7 March 2023

Venue: St James, Guernsey

Time: 4.30 pm

**Learn how thinking differently about cyber risk can make it well suited for and boost the value of captive programs of large corporations**

Ryan Dodd and Mark Heath will present on how thinking differently about cyber risk makes it well suited for and can boost the value of captive programs of large corporations.

**Ryan Dodd, Founder and CEO, Intangic.** Ryan leads Intangic's data science, technology and product vision. An entrepreneur with real-world cyber and financial modeling experience. 20 years as hedge fund manager (including Man GLG) and structuring financial risk products.

**Mark Heath, Head of Insurance, Intangic MGA.** Mark has 35 years' experience in the insurance industry in both underwriting and broking, including senior global underwriting and executive roles at AIG and Aon prior to being CEO and co-founding Acies MGU. He has decades of experience across many different classes of insurance including innovative solutions with a background in risk financing and captive reinsurance.

Soon-to-be launched Intangic MGA is data science-driven, with unique risk expertise across insurance, cybersecurity and financial markets and is trusted by industry leaders.
